Convention Centre – L&T Constructions HQ

Larsen & Toubro is a major technology, engineering, construction, manufacturing and financial services conglomerate, with global operations for customers in over 30 countries around the world.

L&T HQ was spending huge amount for their group/client gatherings, get-togethers, award functions, where the management sense the expenditure was mounting year on year, we ORIGIN proposed on the convention hub plan to have flexibility to create any style for their event, ensuring they feel the most sophisticated atmosphere every time.

A versatile seating capacity of 750+ arranged in three clusters. To experience the finest audio we proposed on the industry's best sound system with line array speakers, stage monitors, sub woofers and floor mounted speakers are installed;

Apparent visual for 750+ audiences was nightmare for the client! And conventional projection was not their priority and wanted something innovative for their hall, thanks to the technology... largest single LED/LCD panel was introduced in the market. It was certainly a great satisfaction as a system integrator to install 1st 98 Inch LED/LCD panel in INDIA and this was completely an eye catcher for every single audience in their meetings.

Project Value – 75 lakhs

Technology Partners

Command Centre - ISRO

ISRO is the supremo of a new era in commercial space exploration.

Indian Space Research organisation was seeking for the best solution with respect to setting up their NOC solution. We Orgin were given an opportunity to design and implement the infrastructure.

Project Value – 4.5 Crores

Technology Partners

ORIGIN for IIT – Palakkad & Tirupati

Indian Institute of Technology is one of the premium educational institutions where many master minds are shaped. The institution requires the help of advanced technology to assimilate knowledge and talents in a more professional manner.

ORIGIN was awarded to design and build the digital learning solution for the newly ventured IIT's at Palakkad & Tirupati. The project includes implementation of AV solutions in the Virtual Class room, Conference room and board room.

Project Value – 1.31 Crores
